MINUTE 50

New information

Hamilton Depot's cellular gateway has been unreliable. At 6:47 p.m. Eastern it reconnected and delivered 10 alerts it had been holding.

FILE	WHAT'S IN IT
`hamilton_backfill.csv`	Same columns as alerts.csv

What to do

- Decide what, if anything, changes in what you've built and in what Maple Freight should do tonight.
- Update your build and your top 3 if they need it.
- Add a section to your README titled **"What changed after the new information"**. "Nothing" is a valid answer if you can say why.

Same hard stop: 2:40 p.m.
